

For Employees

Time recording is painless with features like Inline Timesheet Editing and the seamless integration into task management. Lets employees focus on their work, not recording their time.

"Before implementation of Jira bundled with Tempo Plugin and GreenHoper plugin, SKG personnel had to use four different systems for issue management, agile development planning and management and time tracking. Now all that areas are covered by one application and all data kept in one database."

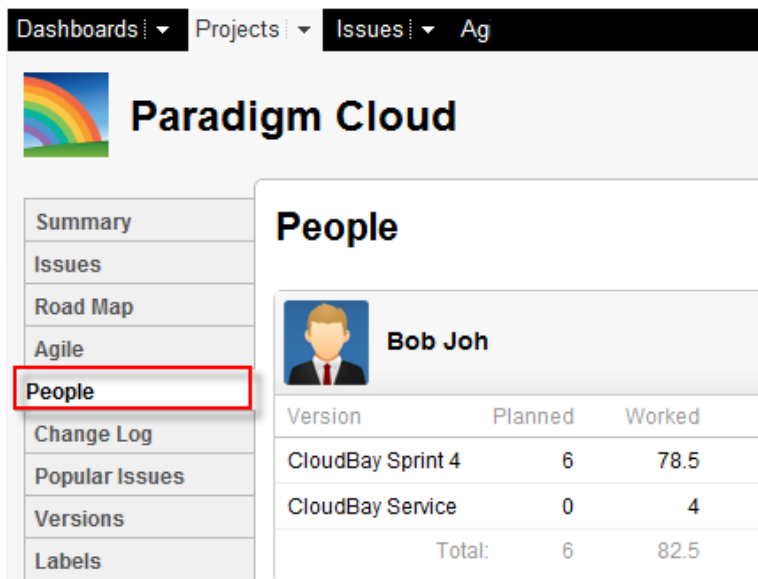

Jarek Glowka

President of SKG S.A.

SKG S.A.

For Project Managers

Use team and project time sheets and other tempo features to plan, track, and adapt your project as easy as it is for your team to record and plan their time.

"We searched quite a long time for a handy and secure workflow to manage the billing of hours worked on JIRA tickets. With TEMPO we found what we were searching for. Only TEMPO makes JIRAs worklogs manageable and gives us the transparency and security that we need.."

Patrcik Schuh

Manager

For Account Managers

Show customer projection, activity and bills, quickly adapt them just as easily.

“Tempo has helped us by providing a time reporting tool already integrated with our daily work (JIRA is our change management tool). Any other time reporting tool would be much higher level and would not be able to provide the detailed metrics we can get from Tempo.”

Trisha Price

Director

Tempo For Executives

“Part of the potential of JIRA is to manage your planning and time tracking processes, not just run a helpdesk. Thanks to Tempo, XenIT was able to leverage JIRA and Greenhopper from an issue management system to a team management system. The introduction of tempo and JIRA actually motivated our team to improve their administration discipline”

Ronny Timmermans

Managing Director XenIT N.V
